PROFESSIONAL SUMMARY

Software Quality Engineer with 4+ years of experience in test automation, CI/CD integration, and end-to-end testing of complex systems. Proven expertise in Java-based automation frameworks (TestNG), API testing (Rest Assured) and UI testing. Experience with AI-driven testing tools and LLM data quality validation.

EXPERIENCE

Software Quality Engineer 3 | Saviynt, Los Angeles ***Jul '24 – Now***

- Developed comprehensive test strategies for **PAM** features, partnering with product managers and developers to define acceptance criteria and adopt **shift-left testing approach**
- Designed and implemented automation framework for 45+ REST APIs using **Rest Assured and Python**, reducing regression cycle time by 40% and improving release quality
- Automated 90% of JITA feature using **PyTest** with YAML-driven parameterized test data, creating **scalable** and maintainable test architecture
- Built UI automation suite using Python and **Robot** Framework for critical sanity validation paths
- Owned **CI/CD** integration by implementing automated test suites in **GitLab** pipelines, enabling continuous testing for every build
- Leveraged AI-driven tools (**Amazon Kiro CLI**) to accelerate test automation development by 25%
- Led functional and integration testing ensuring compliance with zero trust security principles

Software Quality Engineer | Scale AI, San Francisco ***Mar '24 – May '24***

- Ensured data quality and integrity for training datasets used by top 5 LLM models
- Developed quality assurance strategies in **agile** environment, adapting testing approaches across multiple client projects with rapid iteration cycles
- Developing strategies to find noise early in the process and deliver substantial data

Software Development Engineer in Test | Informatica, Redwood City ***Apr '21 – Dec '23***

- Created and maintained backend automation in Java **Rest Assured** framework for ~15 features of the product which was used for **regression** testing in time intensive situation
- Onboarded 4 new NoSQL connectors in the existing product by doing complete **functional and non-functional** testing which eventually led more adoption of the product in the market
- Collaborated with senior engineers to create a test framework in **Java** following OOP concepts
- Used **Selenium** framework with Java to conduct product's UI testing
- Engaged with the customers to support demos, POC and resolve issues, gaining **20+ new prospects**
- Actively improved **Jenkins** pipeline for the full product test coverage
- Participated in the production maintenance windows on AWS, Azure and GCP for 12+ **cloud** releases

Quality Engineering Intern | 8x8 Inc., Campbell ***June '20 – Dec '20***

- Worked on automation of test cases related to SSO and Switchboard
- Improved ~70 existing test cases and added new cases to the **TestRail** as well as automation suite

PROJECTS

Cypress Automation for Ecommerce website and web controls ***May '24***

- Learnt and implemented **Cypress** framework for all UI web controls using page objects
- Built cucumber feature script in cypress for **BDD**; integrated reporting using third-party package

TECHNICAL SKILLS

- ***Programming Languages:*** Java, Python, Gherkins, Cucumber
- ***QE Related Technologies:*** Cypress, Rest Assured, PyTest, Robot, TestNG, Selenium, Allure Reportsm
- ***Web Development:*** JavaScript, TypeScript, RESTful services, Postman
- ***JavaScript Framework:*** Node.js, React.js, Mocha, Chai
- ***Development Tools:*** Jira, Jenkins, IntelliJ, TestRail, Workbench, VSCode, GitHub, GitLab, Zephyr
- ***Database:*** MongoDB, Azure Cosmos, AWS Document DB, Elasticsearch, Dynamo DB, MYSQL

EDUCATION

San Francisco State University **| M.S in Computer Science** | Aug '18 - Dec '20 | GPA: **3.7**
Symbiosis Institute of Technology | **B. Tech in Computer Science** | Aug '15 – May '18 | GPA: **3.33**
